

LOMBARDO SALVATORE

Backend Developer | Python Developer | Software Engineer Junior

salvolombardoj@gmail.com

Sicily
(SR), Italy

Languages :
Italiano Native-Speaker
Inglese Upper-Intermediate

Portfolio:

<https://github.com/SalvoLombardo>

PROFILE

Backend Developer with 1 year of experience.

Stack: Python | Postgres/MySQL | Flask-FastAPI-Django | Docker-

GithubActions-Kubernetes

EXPERIENCE

Backend Developer- Freelance - 2024 - Today

- WebApp for an atelier store(Django+Postgres)

Management system, online shop, automatic invoice generation and statistics. (Demo-Version link: <https://github.com/SalvoLombardo/Django-Invoice-Statistic-multiapp>)

- WebApp for an musical association (Flask-Monolitich+Postgres)

Management of subscription campaigns with history, production of subscription lists in Excel, intelligent subscription assignment. (Demo-Version link: https://github.com/SalvoLombardo/mascagni_demo)

- Backend AI based Flask+FastApi (Flask RestfulAPI+FastAPI+Postgres)

Personal project, dual-framework for routing requests to AI LLM models, applying FastAPI on a framework not optimized for asynchrony, to have an applicable system that gets responses from endpoints and processes them with AI for better personalization. (Demo-Version link: <https://github.com/SalvoLombardo/External-AI-Integration-plus-Economic-Planner>)

- RAG w/FastAPI-SQL-VectorDB

A RAG with embedding conversione, saving and query on a vector db(Demo-Version link: <https://github.com/SalvoLombardo/FastAPI-AI-DocIntellect-RAG>)

- (Extra) Jazz Guitar Teacher and Musician - 2013- Today

- (Extra) Co-Artistic Director for Music Association - 2020- Today

EDUCATION

- Industrial Technical Institute Diploma, Computer Science and Programming – ITIS Palazzolo A. – 2010

- Bachelor's Degree in Jazz Guitar – Conservatory of Messina A. Corelli – 2013

- Master's Degree in Composition and Arranging for Jazz Orchestra – Conservatory of Messina A. Corelli – 2016

SKILLS

- **Languages:** Python
- **Web Framework:** Django, Flask, FastAPI
- **Database:** PostgreSQL (main), MySQL,VectorDb(basics)
- **Testing:** Pytest, Mock, Fixture
- **Cloud:** AWS (EC2, S3, IAM, Lambda)
- **DevOps / CI:** Docker Compose, GitHub Actions
- **AI / ML:** integrazione modelli LLM, RAG, embeddings
- **Versioning:** Git / GitHub
- **Others:** middleware, ORM avanzato, gestione asincrona
