

LOMBARDO SALVATORE

Backend & Cloud Developer · Python · AWS

Sicily, Italy · Open to remote (EU / international)

salvolombardoj@gmail.com · github.com/SalvoLombardo · linkedin.com/in/salvo-lombardo

Currently pursuing **AWS Solutions Architect – Professional (SAP-C02)** — *in progress*

SKILLS

Languages:

Python

Web Framework:

Django, Flask, FastAPI

Database:

PostgreSQL (main),
MySQL, VectorDB, NoSQL

Testing:

Pytest, Mock, Fixture

Caching:

Redis

Cloud:

AWS
(VPC, Subnets, Peering,
Security Groups, IAM &
Policies, EC2, S3,
Lambda, Route53,
CloudWatch, SQS/
SNS, Redis, Aurora, RDS, Redshift, Security)

Containerization :

Docker

Orchestration and IaC :

Terraform

AI / ML:

LLM integration, RAG
pipelines, embeddings

Versioning:

Git / GitHub

Familiar with :

Kubernetes,
CloudFormation, Kafka

Languages :

Italiano Native-Speaker
Inglese Upper-
Intermediate

PROFILE

Backend developer (~1.5 yrs) building production-minded Python systems on AWS - FastAPI / Flask / Django, PostgreSQL, Docker, Terraform, with a focus on event-driven, cloud-native architectures and documented design trade-offs. Moving toward a cloud engineering / cloud security track.

EXPERIENCE

Backend Developer- Freelance - 2024 - Today

- AI-powered personal finance planner.

FastAPI · AWS · Terraform · React

Event-driven AWS backend: FastAPI on Lambda → SNS → 3 SQS queues (w/ DLQs) → consumer Lambdas. Async, provider-agnostic AI pipeline (OpenAI/Anthropic/Gemini/Ollama); API keys encrypted at rest (Fernet); Redis rate limiting. Terraform IaC (prod-grade RDS module + deliberate \$0 Free-Tier deploy). React/Vite/TS on S3 + CloudFront.

(Demo: **AWS** (actual app) / **GitHub**)

- Flight search + AI trip planner

FastAPI · React · PostgreSQL · Redis · AWS

Cheapest-fare reverse search across EU airports + AI multi-city trips within budget/duration. Two Strategy-pattern layers, flight providers (SerpAPI→Amadeus) and LLMs (Gemini→Groq→Mistral) over a 5-step async pipeline. CloudWatch structured logs; CI/CD via GitHub Actions to S3 + CloudFront + EC2.

(Demo: **Link** (actual app) / **GitHub**)

- Multi-Agent Personal Life-OS (Telegram)

Conversational multi-agent system: Telegram bot (text/voice via Whisper) → LangGraph orchestrator (intent classification, confidence-gated routing) → domain agents with tool-calling over FastAPI services + multi-tenant Postgres (RLS). Provider-agnostic LLM (OpenAI/Anthropic). Read-only Next.js dashboard w/ Supabase JWT auth; structured logging, rate limiting, coverage-gated CI/CD, Docker; deployed on Railway + Vercel. (Private beta · phased steps · actively developed, soon available)

- Membership Management System

Flask · PostgreSQL

Subscription-campaign management with full history, automated generation of membership lists in Excel, and smart membership assignment. In daily production use by a real cultural association (private repo). (Code: **GitHub**)

- (Extra) Jazz Guitar Teacher and Musician - 2013- Today

- (Extra) Co-Artistic Director for Music Association - 2020- Today

EDUCATION

- Industrial Technical Institute Diploma, Computer Science and Programming – ITIS Palazzolo A. – 2010

- Bachelor's Degree in Jazz Guitar – Conservatory of Messina A. Corelli – 2013

- Master's Degree in Composition and Arranging for Jazz Orchestra – Conservatory of Messina A. Corelli – 2016
